

HELP PREVENT THE SPREAD

Vehicle Cleaning Instructions

A clean work area promotes a healthy environment. You have a role in keeping your work area clean.

If you share a work vehicle with others, you should sanitize the high-touch areas every time you take over the vehicle, especially during flu season.

Follow these easy steps:

Use a disposable disinfectant cloth to wipe down the following:

- Steering wheel
- Seatbelt clasp
- Door handles
- Other areas that are commonly touched.

Carefully dispose of the cloth immediately after use.
